

ACCESS CONTROL

Our Access Control module is the most advanced of the E4Soft solution. Many hours of research and development have been invested in the best software on the market.

- the access control module can operate in stand alone mode
- our access control module is the only software in North America that is integrated with the DTA of Skidata
- integrated with TeamAxess
- works with RFID, magnetic strip, bar code, finger print and more
- management by activity
- access is controlled using software vs. hardware
- view guests photos as they access the resort controlled areas on mobile tablets;

KEY DIFFERENTIATORS

Management

Choose the best access control solution for your resort

Employees

User friendly interface that is easy to learn

Customers

Fair treatment of all guests

- Control access to multiple lifts, terrain parks, parking lots, tubing, and more;
- Use turnstiles or flap gates;
- Use a hand held scanner or blue tooth scanner linked to a smart phone without using gates;
- validate all runs on a tablet;
- accurately analyze skiers visits and resort use to optimize the required staff;
- add restrictions at any time;
- system can operate in stand alone mode (option);
- direct to the lift is available;

ACTIVATE YOUR BUSINESS. GO

- Gates are not mandatory, you can use a smartphone with a bluetooth scanner or a handheld
- for each ticket or season pass you can define with precision where and when they can go
- you are always in control of who can have access to an activity
- system can manage thousands of runs per hour
- removes negative employee vs. guest confrontation

- validate runs in real time
- access guest details in real time
- software operates on a mobile tablet
- messages can be forwarded to guests

Gestion du contrôle d'accès
