

RENTAL

Our rental application is unique :

- It has been developed with European ski resorts, it can be used for winter and summer rentals.
- This module is fully integrated with the POS, this gives you the opportunity to use the ONE STOP SHOP and sell rental, ticket, lesson and retail products in the same transaction.
- Using a member card, the system becomes paperless.
- The consumer interface can be multilingual independently of the language used by the users.

KEY DIFFERENTIATORS

Management
Wi-fi and paperless let's you optimize the Rental Area .
Employees
No paperwork to manage or fill-out. Quality time spent with the customer.
Customers
Everything is faster so the customer will go skiing sooner.

- You have the choice of Pay First, Pay Last or Pay after;
- Sign-in can be done on a tablet, pc or through the web;
- Technician use a handheld device for their work and do not need to be in touch with customer;
- Paperless, even the waiver can be signed electronically;
- A scan of the driver's licence will get the correct rental information. Therefore a better security for the rental.
- Up to 200 ski adjustments in one hour due to our revolutionar process.
- With the Wi-Fi and the handheld service, the Rental Area can be configured to maximize the space for an efficient flow of rental and return traffic.
